QUESTION

Consider the following graph with 4 nodes and 5 edges.

Let  $G$  be the graph and  $E$  be the set of edges. Let  $V$  be the set of vertices.

## UNIT 10: Culture

Before we start, let's look at some of the different cultures in the world.

There are many different cultures in the world, each with its own traditions and customs.

For example, in Japan, people bow to each other as a sign of respect.

In India, people often greet each other with a traditional 'Namaste' gesture.

Each culture has its own unique way of life, and it's important to respect and understand these differences.

Let's explore some of the most interesting cultures around the world.

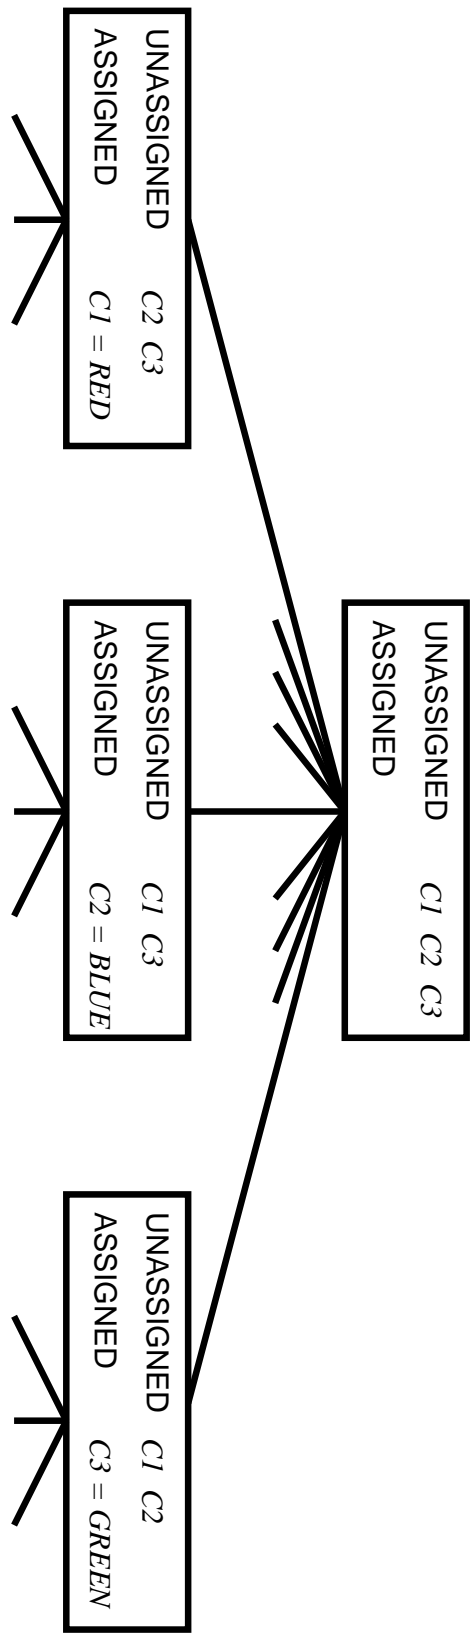

The first five years of the American Revolution were a period of intense political and military activity. The American people fought for their independence from British rule, and the British fought to maintain their empire. The war was a struggle for the future of the American people, and it was a struggle that was fought on many different levels. The war was fought in the courts, in the legislatures, and on the battlefield. The war was a struggle for the future of the American people, and it was a struggle that was fought on many different levels.

# Hotelling's rule and oil

In the Hotelling model, the extraction of oil is modeled as a dynamic programming problem. The extraction rate is chosen to maximize the present value of the oil revenue.

The Hotelling model is a dynamic programming problem. The extraction rate is chosen to maximize the present value of the oil revenue.

$$\max_{\{x_t\}} \sum_{t=0}^{\infty} \beta^t p_t x_t$$

# Algorithm for finding a Hamiltonian cycle

## Construct a partial cycle

### Step 1: Start with a vertex

Choose a vertex  $v_i$  and start a partial cycle  $C_i$  with  $v_i$

### Step 2: Add vertices

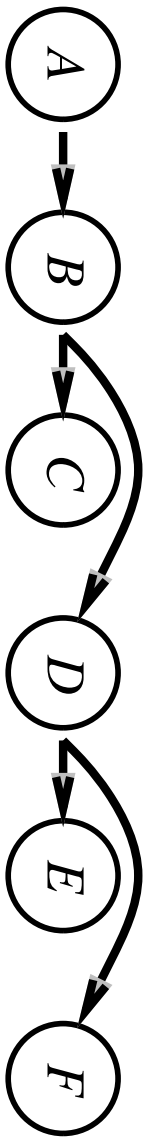

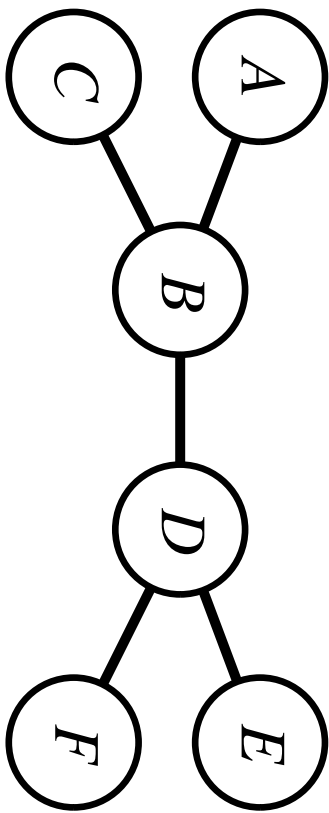

allowed pairs:

- $\langle 1, 1 \rangle$
- $\langle 3, 2 \rangle$
- $\langle 3, 3 \rangle$

remove 2 from  
domain of  $V_i$
